- Problem-solving
- Team collaboration
- Adaptability
- Critical thinking
- Teaching

INTERESTS

- Ballet
- Photography
- Traveling
- Reading books
- Puzzles

WORK REFERENCE

- Available upon request

Software Engineer

LIGIA REZENDE HIRATA

PROFILE

Software Engineer specializing in React, Node.js, and modern JavaScript/TypeScript. Experienced in building scalable, responsive web applications and delivering end-to-end solutions with strong focus on code quality and team collaboration. Seeking remote opportunities.

EXPERIENCE

Software Developer at 55PBX Virtual PABX | Oct 2024 - Present | São Paulo, Brazil (In-Person)

Tech Stack: Node.js (Express), React, TypeScript, Jest, Postman, Git, Jira, Agile Scrum

- Helping revive a stalled frontend refactor by rebuilding core architecture and reusable UI components from scratch.
- Implementing automated testing with Jest and React Testing Library, increasing code reliability and reducing by 60% production bugs.
- Improved codebase stability by identifying missing dependencies and aligning the team with best Git practices.
- Led English training for the development squad, focusing on grammar and technical English.

Freelancer Web Developer | Aug 2024 - Present | São Paulo, Brazil (Remote/ Part-time)

Tech Stack: React, Next.js, Tailwind CSS, Vercel, Git, CI/CD pipelines, Responsive Design

- Designed, developed, and deployed custom websites for multiple clients, delivering responsive and high-performing sites tailored to each business’s goals.
- Managed deployment pipelines and provided ongoing maintenance and performance tuning, ensuring 99.9% uptime and fast load times across all major devices and browsers.

Junior Software Developer at JaxTHRIVE | Aug 2022 - Jul 2023 | Florida, USA (Remote)

Tech Stack: C#, ASP.NET, Bootstrap, Microsoft Azure (Functions, Storage, Authentication), Git

- Collaborated on a web platform for a non-profit organization, helping connect volunteers with mission-aligned partners.
- Co-designed and implemented the front-end UI using modern design principles, improving accessibility and ease of use for 200 active users.
- Supported the integration of back-end services with Microsoft Azure, streamlining data flow and enabling secure user management across the platform.

EDUCATION

Federal University of Rio Grande (FURG) — BS in Biochemical Engineering, Minor in Software Engineering (2015 – 2020). **Graduated with high honors** (grade scale: 0–10, scored above 8.0)

2025 PROJECTS

Photo Blog (Next.js, Serverless, Vercel)

- Developed a personal photo blog using Next.js with serverless API routes deployed on Vercel, enabling secure image uploads, user authentication, and scalable backend logic without managing servers. Implemented efficient image handling and a responsive UI to showcase photography work.

Ballet School Website (React, Interactive Schedule, Material-UI)

- Built an interactive ballet class schedule with React, featuring filterable grids by level, age group, and time of day. Designed a clean, user-friendly UI to help students easily find and book classes, enhancing engagement and improving usability.
